What is/are your child's/children's grade level(s)?

(N=7,228)

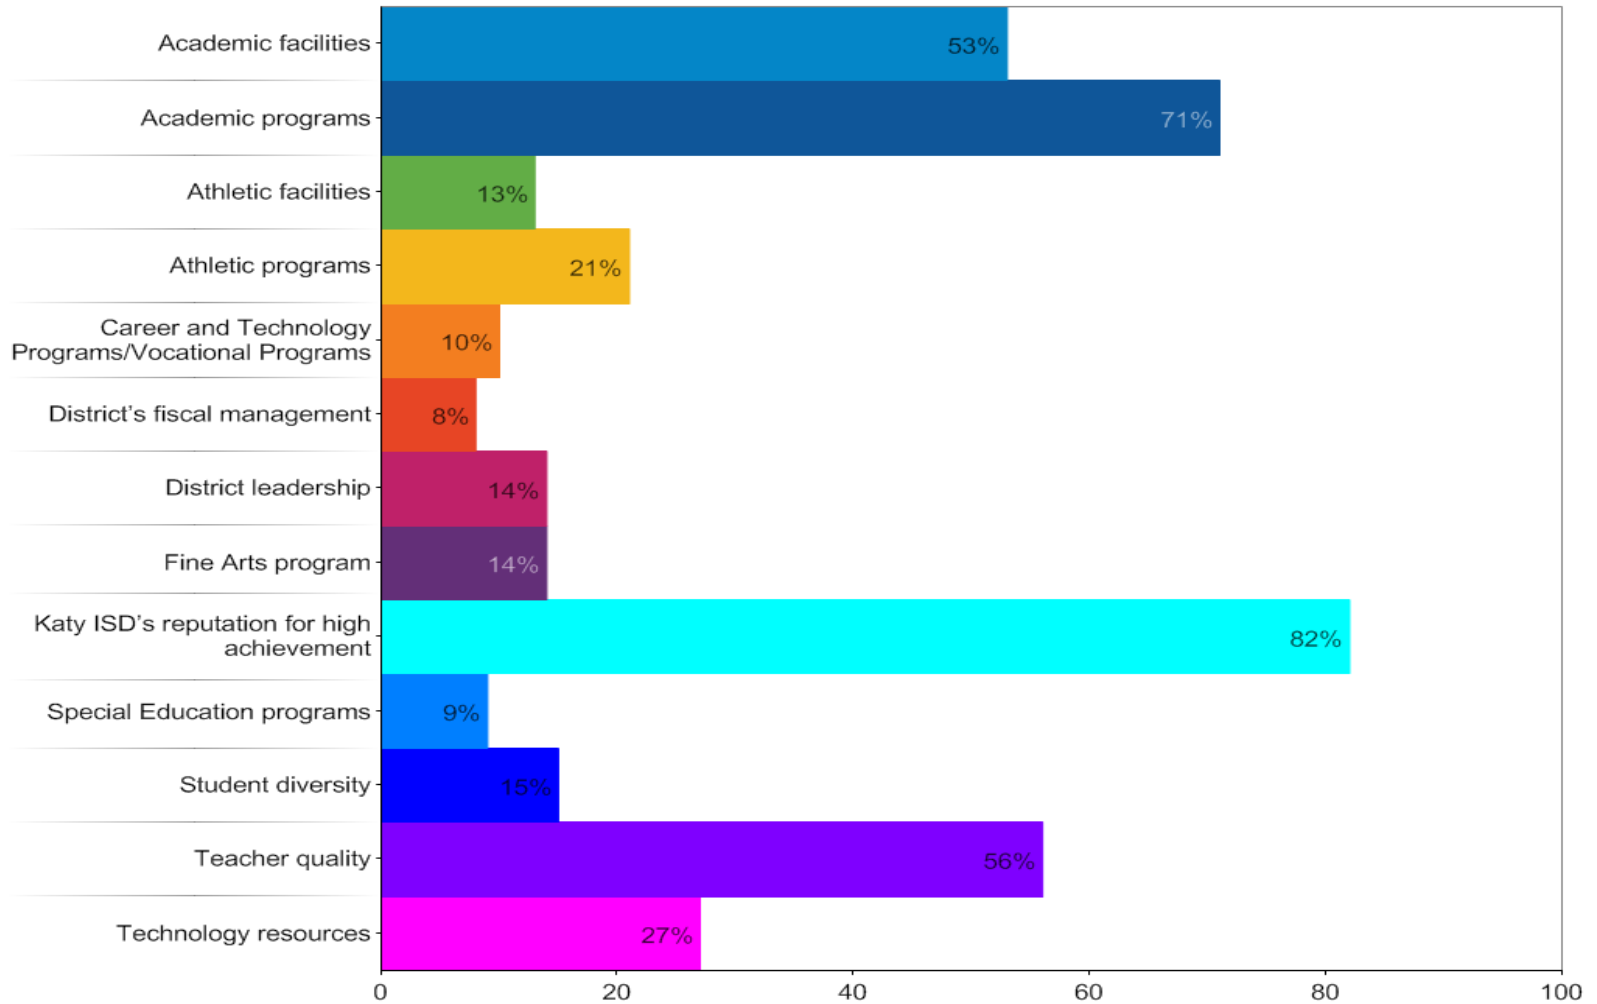

How long have you lived in the District?

Katy ISD values all of its students and parents and is interested in understanding the factors that influenced your decision to enroll your child in a Katy ISD school. Please select the factors that influenced your decision to enroll your student(s) in Katy ISD.

(N=6,623)

Since 2006, student enrollment has increased from 51,000 students to more than 67,000. In addition, it is projected to increase to more than 86,000 students by 2022.

The Texas Education Agency requires elementary schools to maintain a maximum student-to-teacher ratio of 22 to 1 in kindergarten through 4th grades.

Campus facilities are often supplemented by portable units to support larger than capacity enrollment. Portables fulfill an immediate need and are put in place as part of the District's long-range facility plan.

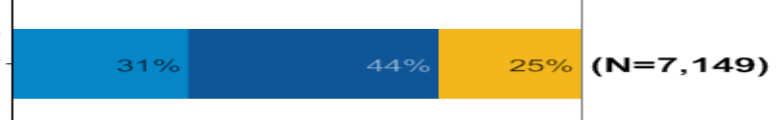

Once new student enrollment at a given facility is high enough to justify a brand new campus, a comprehensive facility bond may be proposed.

Since 1994, Katy ISD has passed six bond proposals to build new schools to accommodate student growth. This has resulted in the construction of 32 new campuses since that time.

While the southwest quadrant has experienced much growth in recent years, most of the new population growth will occur north of I-10 (west of Grand Parkway) over the next 10 years. Click here to see a map of the District, existing attendance boundaries and projected growth.

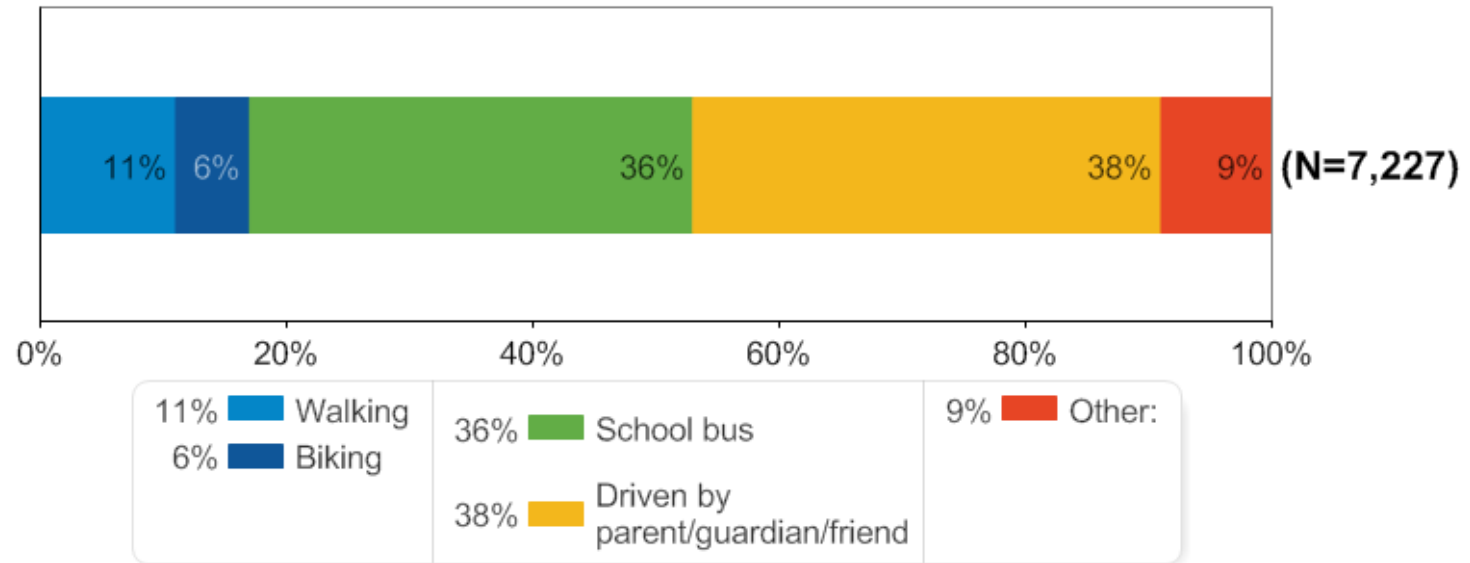

It is projected that two more junior high schools, possibly two more elementary schools and two more high schools will need to be built north of I-10 (west of Grand Parkway) over the next three to 10 years to accommodate growth in that corridor.

What is your child's primary method of commuting between home and school?

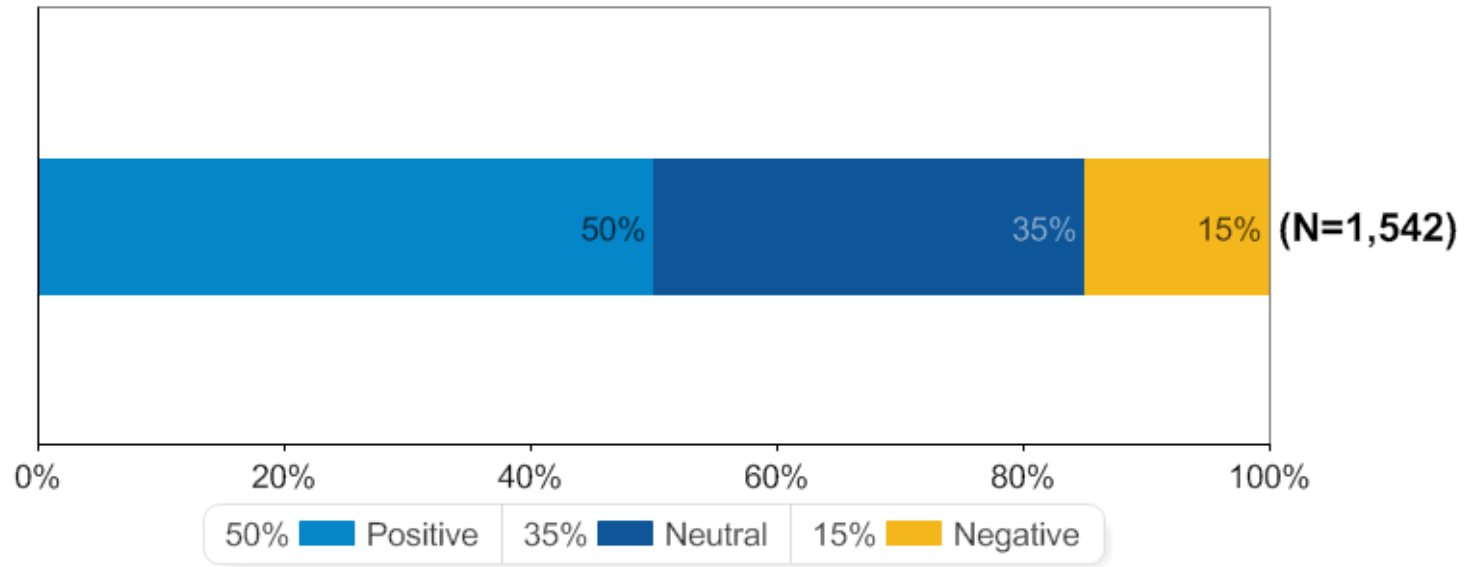

Has your child previously been impacted by an Attendance Boundary Modification in Katy ISD?

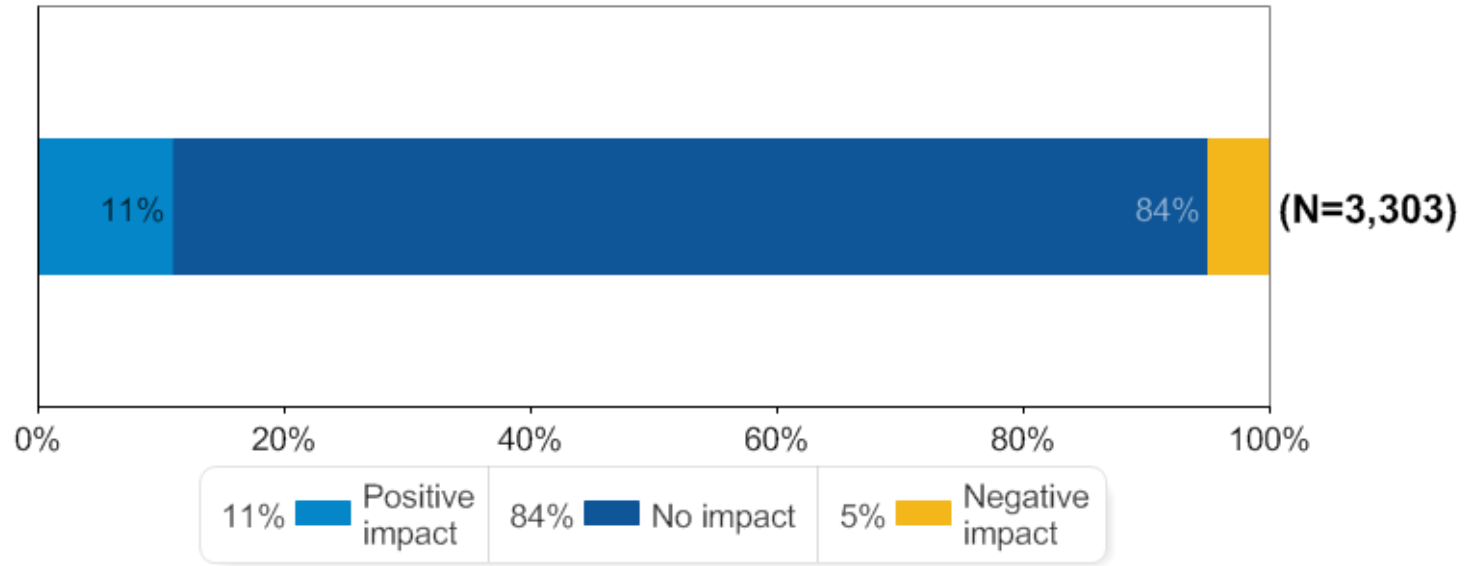

How would you describe your experience during the ABM process?

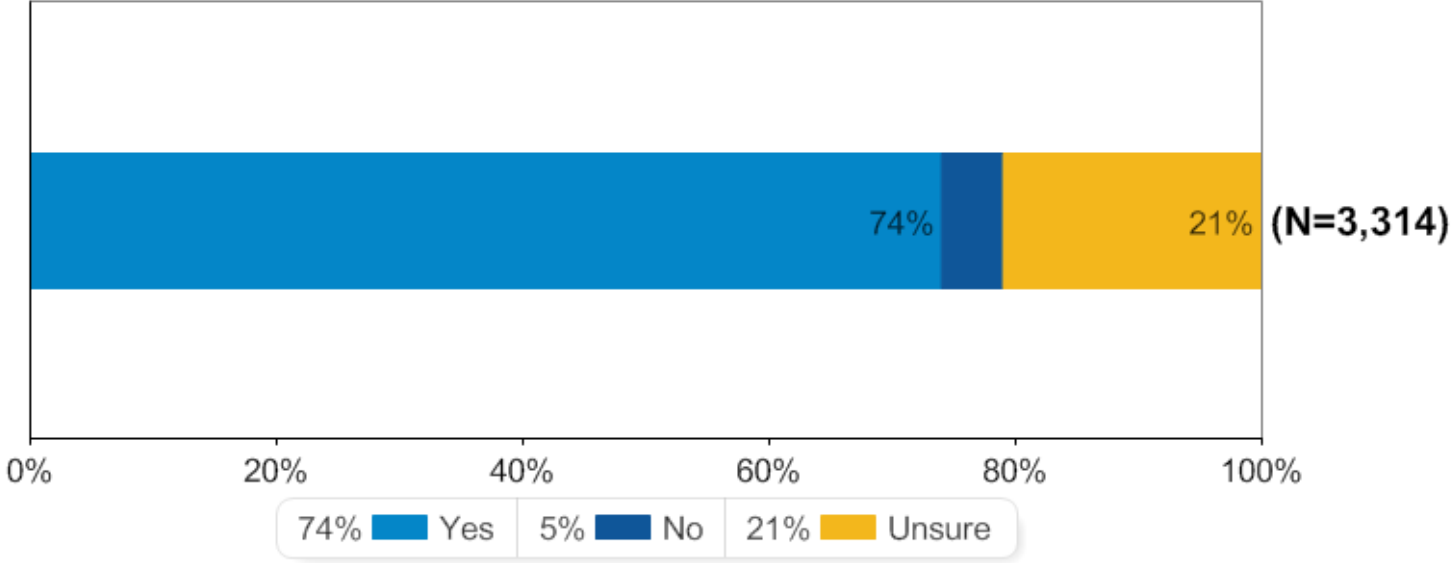

How would you describe your child's experience in his/her new school?

Please rate the type of impact the proposed modification would have on your student's commute to school.

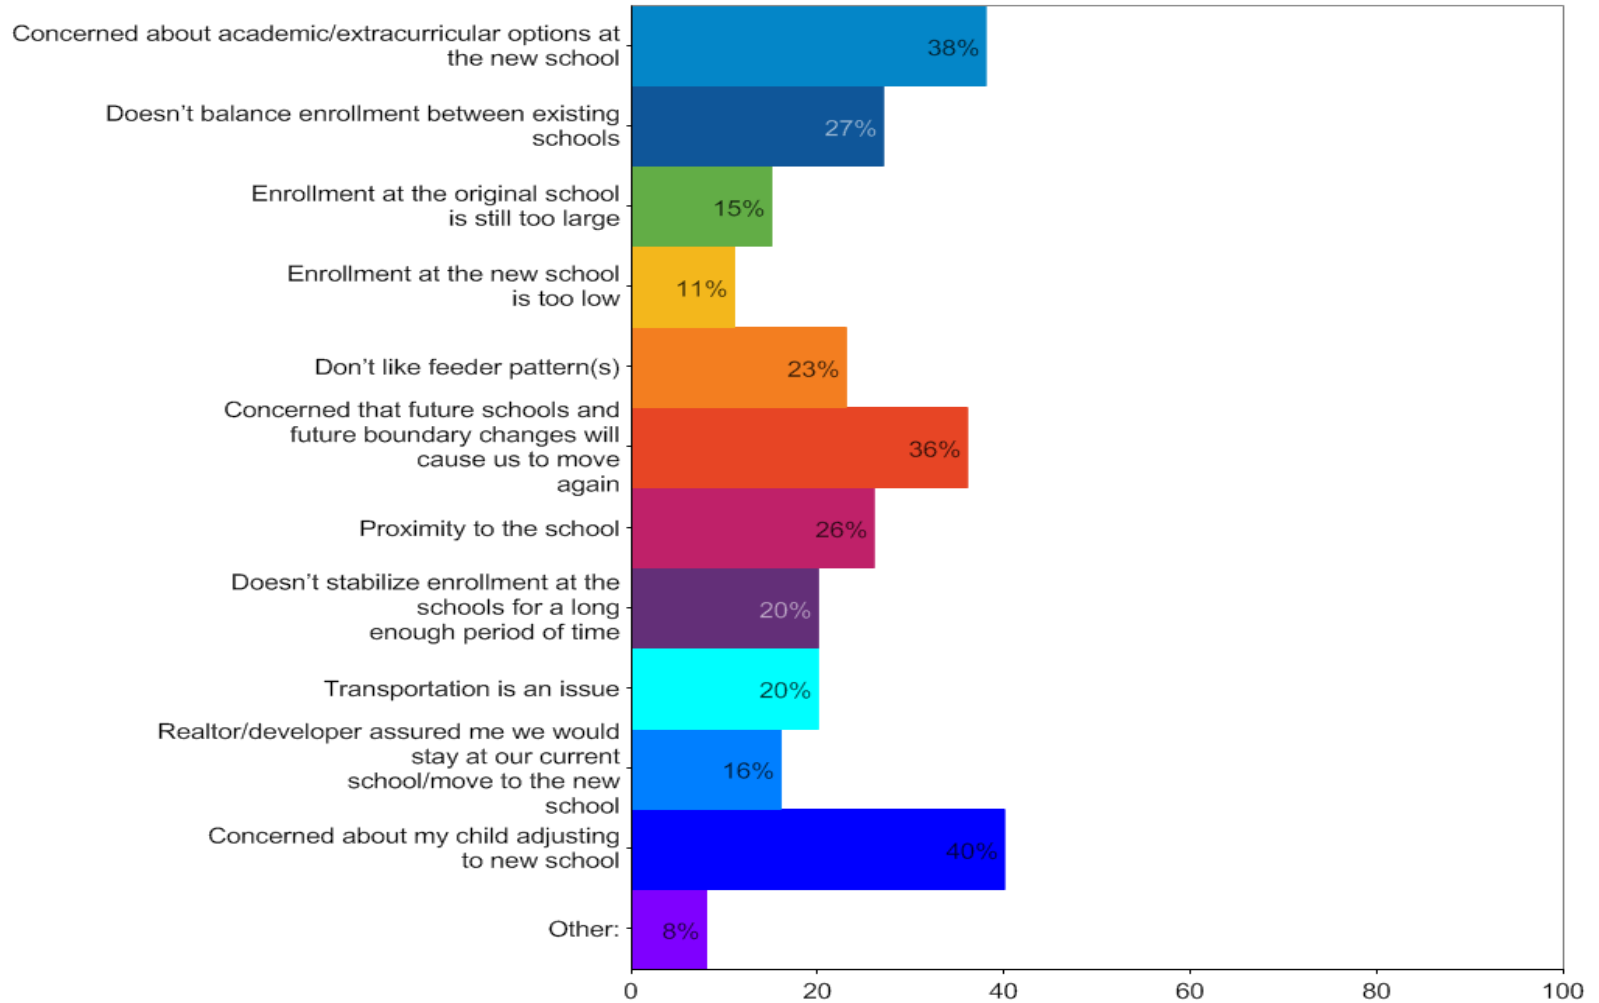

Do you support modifying attendance boundaries in the southwest quadrant as a way to address student enrollment growth and provide relief to campuses reaching capacity?

Which factors influence your opposition to the proposed ABM recommendation?
