

# General Project Information

## **Boiler Replacements**

Project: Domestic boiler replacements

Project Description: Replacement of identified domestic boilers at THS, CRHS, MRHS, and SLHS.

Project Priority: 1

Background & Justification: The identified boilers at these campuses have become unreliable and require frequent repairs and servicing to keep hot water available to the campus. When they are down, lunchroom service is affected and the campus does not have hot water for hand washing or showers. These boilers are original equipment to the campus. The replacement boilers will have a much higher efficiency rating, reducing the utility cost.
