

# General Project Information

## **Roof Replacements**

Project: Roof Replacement and waterproofing

Project Description: Replacement of identified areas of roofing at CRHS, HE, SCE, KJH, Maint. Annex, and WMJH; and waterproofing of the exterior walls of SLHS.

Project Priority: 1

Background & Justification: The District maintains a detailed database and inventory of each facilities' roof and waterproofing. This information is updated continuously and as buildings age the Maintenance Department monitors the roof surfaces and applies coatings to prolong or extend the life of the roof areas. The identified areas of roofing at the campuses listed require frequent patching because they have exceeded their life expectancy. The exterior of SLHS requires the waterproofing to be repaired and/or replaced to prevent water from entering and damaging the walls or brick surfaces of the campus.
